

Your trusted partner in the **new** restaurant technology ecosystem.

## Who we are

OGC helps restaurant operators connect with the technologies and partners that actually make their business better. We sit at the intersection of operations, technology, and growth – translating complex solutions into real-world results.

Our team has spent decades inside restaurant brands, technology companies, and consulting firms. We know how to separate marketing hype from measurable impact.

## What we do

OGC connects operators with vetted technology vendors that improve performance across every layer of the business – from guest experience and loyalty to data, labor, and supply chain.

### We Help Operators:

- **Discover the right tools without wasting time in endless demos.**
- **Validate which solutions integrate with your current systems.**

**Negotiate smarter partnerships and avoid long-term traps.**

- **Tap into lessons learned from hundreds of implementations.**

***"Bottom line: We'll help you focus on what works, and who's worth your time."***

Matt Haselhoff, CEO at OGC

## Who we work with

We collaborate with future-forward restaurant technology companies that share our commitment to innovation and operator success, including:

Curbit, Livelytics, Fingermark, Shifty, Bite, Secure Uptime, Voicyfy, MagicGate, Food Boss, and Khumbu Systems, among others.

### Why Operators Want to Work With Us:

- We're vendor-neutral. Our only goal is to match the right solution to the right need. Zero hard sell.
- We know the landscape. The OGC team tracks over 400+ active restaurant tech platforms.
- We speak your language. We've been in your seat - running stores, managing systems, and making payroll.
- We cut through the noise. Instead of sales pitches, you get insights, benchmarks, and results.

## Get connected

If your tech stack isn't delivering what it should, or you're simply tired of sorting through endless vendor options, talk to OGC.
